NEWELL, CALIFORNIA

NOVEMBER 16, 1944

RENUNCIATION BILL

INITIAL PROCEDURES CLARIFIED BY LEGAL AID

Japanese Americans in this center desiring to renounce citizenship should write directly to Edward J. Ennis, Director, Dept. of Justice, Alien Enemy Control Unit, Washington, D.C., revealed T. Nakamura, counselor of the Legal Aid Section. The necessary forms will be sent directly to the individual applicant, he stated.

Completed forms, together with a certified copy of the applicant's birth certificate, should then be sent to the Attorney

General, Dept. of Justice, Washington 25, D. C. for his approval for the applicant's local hearing, according to Nakamura. (It can be recalled in the earlier announcement regarding renunciation of citizenship that hearings for the individual applicant may or may not be approved by the Attorney General, and that in any event the mere sending of the application does not in itself constitute the applicant's cancellation of citizenship.--Ed. Note.)

The Legal Aid counselor further advised that photostatic copies of birth certificates may be obtained by sending the original to Edgar Pippin, c/o WRA Health Section, 461 Market Street, San Francisco, Calif. Prices are: 8 1/2" x 11", \$1 for one side and \$1.50 both sides; 8 1/2" x 14", \$1.50 for one side and \$2 both sides.

Block Managers REVEAL IMONHIN SHIPMENT NEAR

Lauding the cooperation of center residents for their overall participation in the Imonhin Drive, the Block Managers' Headquarters announced yesterday that the majority of items have been assembled and are now being readied for shipment.

Headquarters revealed that the quota of Japanese slippers was filled this week, and last Saturday ward volunteers, assisted by Mess Operations, made 8000 okoshi cakes. It was further stated that pickled radishes have nearly seasoned for shipping.

It was also reported by the block managers that a decision to send salted fish as a substitute for cigarettes was reached by the gift committee recently.

Introducing

With no less amazement than our readers, we present C. Larus Laridae, the animadverting gull whom we met cogitating on the local firebreak this morning.

Incidentally, C. stands for Caliph with a period.

"It's damn cold...damn cold," is all he said today.

But that's a mouthful, for this morning the thermometer read 3° at 7 a.m.

MESS OPERATIONS MAKES REPORT ON BAKERY OUTPUT

The Bakery Shop, in the first month of operation, produced 53,390 pounds of bread and 344 pounds of coffee cakes for center consumption, according to the October report from Mess Operations.

The average cost per pound of bread was placed at 6 cents. This cost will be substantially reduced for the following months since expenses for various fixtures were included in the October report.

The Bakery Unit is under the supervision of Andrew Heintzelman.

HOUSING CLOSES INDEFINITELY

Francis Bagley, Social Welfare counselor, announced this week that the Housing Office at 714-A will be closed indefinitely, effective today. At the same time he stated that housing changes will be frozen temporarily unless an emergency occurs. During this period the Housing staff will work on the new directory, he added.

Any housing problem should be taken to one of the branch Social Welfare offices, Bagley concluded.

APPROVAL ON 2 PROJECTS RECEIVED BY OPERATIONS

Operations Division has received approval from the Washington Office for the construction of a funeral parlor and a caretaker's office to be located at the cemetery opposite Block 59, states Paul Robertson, assistant project director in charge of Operations. Construction of these buildings is expected to start in the near future, he added.

Robertson also revealed that permission has been granted by the Washington Office to employ evacuee workers to line the "H"

canal, which separates the old area of the colony from the "Lanzar" area, with concrete. This project is being undertaken by the WRA for the Reclamation Department for the sole purpose of furnishing employment for the evacuees. The canal will furnish water beyond this camp and will not in any way benefit the camp irrigation system.

This project probably will not be under way until next spring, and can only be constructed under favorable weather conditions.
